Summary

I am a promising Frontend Developer specializing in React, Redux, and modern web technologies. I design user-friendly, scalable applications that enhance user experiences and drive engagement. My expertise includes crafting responsive interfaces, implementing efficient state management solutions, and integrating complex APIs. With a keen eye for detail and a passion for delivering high-quality code, I am dedicated to creating seamless and interactive web experiences.

Professional Experience

Front-End Software Developer, LeafGrow Startup, Germany
April 2024 – Present
Key Responsibilities:
- Managed state using Redux to ensure consistent state management.
- Seamless integration of frontend and backend using API and Node.js.
- Efficient handling of API requests and troubleshooting issues.
- Developed intuitive user interface components and interactive features.
- Implemented secure functions for user registration and authentication.
- Managed and updated user profiles.
- Personalized content based on user preferences.
- Worked in a highly collaborative team environment.
- Outstanding teamwork, significantly contributing to the project's success.

Fullstack Software Developer Intern, AIT TR GmbH, Germany
November 2023 – June 2024
Key Responsibilities:
- Developed dynamic applications using JavaScript, TypeScript, and React, creating efficient and responsive user interfaces with Redux, Tailwind CSS, HTML5, and CSS.
- Integrated interfaces with APIs and Node.js to enable seamless communication between frontend and backend.
- Deepened my knowledge in Java and Spring (Spring Boot, MVC, Security, Data JPA) to build robust backend solutions, with efficient database operations using Hibernate.
- Managed project dependencies with Maven and deployed applications via Tomcat.
- Implemented web communication and web services using HTTP and REST.
- Executed complex database queries with SQL (MySQL, PostgreSQL).
- Versioned database changes using Liquibase.

Head of Legal Department, Promstroykontrakt Construction Holding (Samara, Russia)
September 2014 – February 2018
Key Responsibilities:
• Contract management, negotiation, and drafting of contracts
• Account management and handling of claims
• Monitoring compliance with internal policies and procedures
• Planning, coordinating, and overseeing projects
• Enforcement of claims against legal and natural persons
• Organization and management of all legal and project-specific documents and records
• Collaboration with internal departments, external partners, and attorneys
• Budget responsibility for the legal department
• Identification of process improvement opportunities

Lawyer in the Legal Department, Real Estate Management (Samara, Russia)
September 2011 – September 2014
Key Responsibilities:
• Supporting project management
• Organizing meetings and discussions
• Assisting in the drafting, reviewing, and management of contracts
• Document management and deadline monitoring
• Performing general administrative tasks
• Coordinating communication and information between departments

---
